

Cylindrical type proximity sensor

■ Features

- Enhanced noise-resistance by using exclusive IC(DC power)
- Upgraded DC2-wire type :
Residual voltage(Max. 4VDC), Control output range(2~100mA),
Operation voltage(10~30VDC)
- Polarity free DC2-wire type
- Reverse polarity protection and overload protection(DC),
surge absorption(DC/AC)
- Operation confirmed easily by a red indicator lamp
- Wide range of applications(for replacement of micro switch,
limit switch, etc.)
- IP67(IEC standard)

⚠ Please read "Caution for your safety" in operation manual before using.

Proper usage

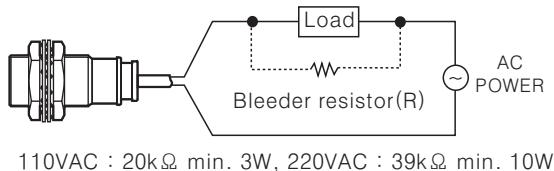

Load connections

When using DC or AC 2-wire type proximity sensor, the load must be connected otherwise internal components may be damaged. And the load can be connected to either wire.

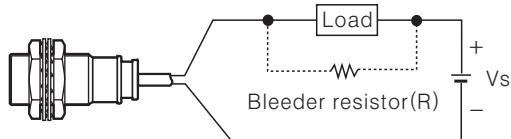

In case of the load current is small

AC 2-wire type

It may cause return failure of load by residual voltage. If the load current is under 5mA, please make sure the residual voltage is less than the return voltage of the load by connecting a bleeder resistor in parallel with the load as shown in the diagram.

DC 2-wire type

$$R \leq \frac{Vs}{Io - Ioff} (\text{k}\Omega) \quad * \text{Vs : Power supply}$$

$$P : \text{Bleeder resistor, number of W}$$

$$Io : \text{Operating current 2mA of proximity sensor}$$

$$Ioff : \text{Return current of load}$$

$$P > \frac{Vs^2}{R} (\text{mW})$$

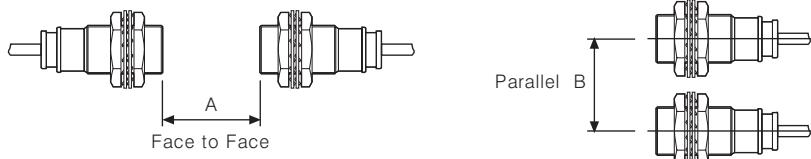

Please make the current on proximity sensor smaller than the return current of load by connecting a bleeder resistor in parallel.

* W value of Bleeder resistor should be bigger for proper heat dissipation.

Mutual-interference & Influence by surrounding metals

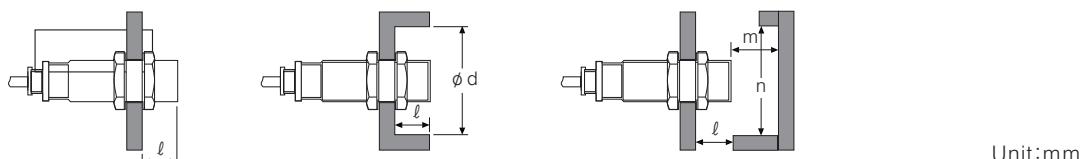

Mutual-interference

When several proximity sensors are mounted close together, malfunction of sensor may be caused due to mutual interference. Therefore, be sure to provide a minimum distance between the two sensors, as below charts.

Influence by surrounding metals

When sensors are mounted on metallic panel, you must prevent the sensors from being affected by any metallic object except target. Therefore, be sure to provide a minimum distance as below chart.
